

Motorhome rear parking sensor kit including 6 flat capsules with buzzer

Art. Nr: PDC-SET-16MH

Rear and side parking aid for motorhomes, six sensors. Digital rear and side parking aid for motorhomes with six sensors

- Ideal for extra-tall or extra-wide vehicles and motorhomes
- Highly compact sensors at 18 mm and make neat and perfect installation easy
- The sensors warn against tree branches, low entrances and bridges with an acoustic warning function
- There are three mounting options to ensure ultimate protection
- The sensitivity of the sensors can be set in three steps
- Operation is possible with tow-bar in place
- Manual switching between two stop zones (e.g. bike rack folded in or folded out)
