

Lokithor JA301 2000A Lithium Jumpstarter (74Wh) with compressor (150psi)

Art. Nr: LOK-JA301

1. LOKITHOR JA301 2000 amp jump starter with air compressor is a 4-in-1 multi-function device that serves as a jump starter, tire pump, power bank and LED flashlight. LOKITHOR JA301 12v battery jumper is compatible with many vehicles, including cars, motorcycles, boats, RVs, ATVs, SUVs, vans, tractors, and mowers.
2. JA301 best compact car battery jump starter has a super starting current of 2000A to jump-start a dead battery in 1-3 seconds with up to 40 jump-start times for regular use. Professionally calibrated always to display the tire's pressure within 1.0%. Ultra-long standby time of at least 900 days.
3. JA301 battery-powered car jump starter only needs 5 minutes to inflate the 195/65/R15 car tire from 0 to 35 PSI with a maximum pressure of 150 PSI and airflow of 35L/Min. Suitable for gasoline engines under 8L and diesel engines under 6L.
4. JA301 car battery jumper box supports fast charging with USB 3.0 compatibility. Output: 5V/3A and 9V/2A, Input: 5V/3A and 9V/2A. Integrated 300-lumen LED flashlight with three lighting modes: constant light, flash, and SOS.
5. The tire inflator jump starter can detect the voltage of the car battery in real time and trigger an alarm for abnormal conditions. It's manufactured with the unique Turbocharged Movement, which provides more power, stability, and less noise.
6. JA301 diesel car jump starter comes with the latest BMS power management system, including short-circuit protection, over-current protection, reverse connection protection, over-heat protection, over-time protection, and clip falling-off protection. The air pump jump starter also supports tire-pressure detection and preset values stopping.
