

Lokithor J1000 1000A Lithium Jumpstarter 12V (26Wh)

Art. Nr: LOK-J1000

1. LiFePO₄ safety battery saves 80% space compared to lead-acid batteries, with a service life that is 2 times longer than traditional igniters and up to 2000 cycles without decreasing performance.
2. The battery cell and intelligent BMS battery system of this 1 000 amp LiFePO₄ supersafe lithium jump starter provide dual safety measures, while the large screen displays voltage output, working status, and step-by-step instructions. With 9 types of protection, including spark-proof, mistake-proof, and reverse-polarity protection, you can confidently use the jump starter power bank without worrying about malfunctions such as short circuits or sparks.
3. J1000 LiFePO₄ jump starter provides 1000Amp up to 60 times jump starts after a full charge. Suitable for 12V vehicles up to 6L gasoline engines or 3L diesel engines, including cars, motorcycles, boats, RVs, Vans, tractors, and more.
4. 60W two-way fast charging: Fully charged in just 25 minutes, and a 3-minute charge can jump-start your device. 60W power output effortlessly charges smartphones, tablets, laptops, wearable devices, and more. J1000 LiFePO₄ power station jump starter provides up to 24 months of continuous power on a single full charge.
5. Rugged build enclosure rated IP65 water-resistant and 94V0 flame retardant, making J1000 LiFePO₄ jump starter advance auto resistant to rain, dust, and drops.
