

Wired truck parking system 4 rear sensors incl. rubber brackets & display

Art. Nr: PDC-SET-13TR

Kit of 4 rear sensors with a buzzer and ultra-resistant, impact-resistant rubber mounts for installation on the front of the vehicle.

Features:

- 16 mm sensors (or 18 mm with included adapter).
- Waterproof connection.
- Installation from inside the bumper, flush with the bumper, without relief.
- Exterior installation with specific brackets.
- Control unit with integrated service display and 2 adjustment buttons, allowing for a multitude of settings, such as:
 - Sensor number management (the kit can operate with 2, 3, or 4 sensors).
 - Detection area (center, side, and stop zone).
 - Sensor sensitivity.
 - Sensor volume and tone.
 - Projection detection suppression (the warning zone can be moved up to 30 cm)
 - Automatic system deactivation when a towbar or bike rack is connected
 - Automatic system activation via speed, timing, or reverse signal
