

Interior infrared cabin Camera FHD - U3000 PRO

Art. Nr: TWA-CAM-U3PIR

THINKWARE's Interior Infrared Cabin Camera is designed for interior recording and is to be used in conjunction with the THINKWARE U3000 PRO dash cam. With a Full HD 1080p infrared image quality, the Interior Camera records with color during the day, and its Infrared lights make this camera perfect for recording the cabin in low-light conditions. This ensures a clear, high-quality video, whether you are driving during the day or at night. With a 120-degree viewing angle, the Interior Camera is a great addition for ride-share and cab drivers and fleet managers who want full coverage of the vehicle's interior.

1080p Full HD with Infrared Lights for clear day and night recording quality with colored image during the day and Infrared at night. Infrared Lights (wavelength 950 nm) illuminate the interior of the vehicle in extremely low-light environments, ensuring a clear, bright, and detailed image, no matter how dark it is.

120-degree wide-angle view guarantees full coverage of the vehicle's interior, keeping you and your passengers safe.

The U3000 PRO main dash cam unit can simultaneously support both the Rear View Camera and Interior Infrared Cabin Camera without additional equipment.

Cable Included. Cable length: 0.5 m

Compatible with U3000 PRO

NOTE:

Interior Infrared Cabin Camera and LTE Module cannot be used simultaneously
