

General

The Bluetooth activator interface activates the OEM car kit of Volkswagen. Due to the interface it is possible to control the telephone through the RNS-850 navigation system. The address book and telephone numbers will be displayed on the navigation display and the FIS display in the dashboard.

Features:

- Programmed in only a few seconds, plug and plays
- Activates the original Bluetooth functionality for the RNS-850
- No expensive VW solution for OEM Bluetooth car kit
- No differences compared to the original Bluetooth kit of Volkswagen / Seat
- Full option, same as original
- Controls via touch screen and steering wheel control buttons
- Voice output via the original system (no external speaker)
- High quality & high speed audio output
- Hands free dialling (full duplex) via the in-car integrated microphone and the speakers of the car radio.
- Accept and reject incoming calls and terminate calls via the optional navigation system or the optional multifunctional steering wheel.
- Automatic audio-mute function while calling
- Select numbers from the address book via the multifunctional steering wheel (if available).
- Select numbers with voice control (if Voice control is available).
- Display of strength of signal and network in navigation display*

The following is provided in the set:

- NavInc Bluetooth interface BT-VW-RNS850
- Installation- and User manual
- Warranty
- Invoice
