

DESCRIPTION

General

With the NavInc Bluetooth interface it is possible to stream audio through every smartphone or tablet and to connect these devices with the original radio- and/or navigation system of **Citroen & Peugeot**. The interface makes use of the original CD changer connection port.

Beside the interface is equipped with a Bluetooth carkit function.

Features:

- Connect your Bluetooth device wireless with the original radio/navigation system in CD quality
- Charge function through USB port
- Compatible with Apple, Android, Windows & Blackberry smartphones
- Automatic Stop-Play function when switching from iPod to FM/CD/Tape
- Controls of connected device via original steering wheel controls (when available)
- Controls of connected device via original radio/navigation buttons
- Controls of connected device itself
- Extra audio input via jack 3.5mm (MP3 or notebook)
- Supports music streaming via A2DP Bluetooth protocol
- Supports controls via AVRCP protocol
- Plug & Play cable kit
- Bluetooth carkit function (with controls)
- Automatic Stop/Play function with incoming calls

BLUETOOTH STREAMING FEATURES

Wireless connection via Bluetooth for audio streaming via A2DP complete with charge function possibility (via USB port).

When the source supports AVRCP technology it is even possible to control the connected source via the original radio- and/or navigation system. It is also possible to control via the device itself.

Control options:

- Next track
- Previous track

- Volume +
- Volume -
- Fast forward

Controls also works with Apps like Spotify and Google Play.

AUX INPUT FEATURES

External AUX input via 3.5mm jack connection for connecting external audio sources such as:

- Notebook
- MP3 player
- DVD player
- Etc.

BLUETOOTH CARKIT FEATURES

The NavInc Bluetooth interface is equipped with a carkit function with control functions and automatic Stop/Play function with incoming calls.

Features:

- Carkit function with automatic Stop/Play function
- Automatic synchronization of phone with Bluetooth interface
- **Optional** microphone with echo- and noise reduction
- Automatic mute function (only in CD changer mode)
- Accept, deny and hang up conversations via radio buttons
- Audio of conversations via original sound system

USB CHARGING FEATURES

The NavInc Bluetooth interface has a USB port for charging connected devices.

NOTES

- Check tab 'Compatibility' to see if the interface is suitable for your radio- and/or navigation system
- Audio streaming and carkit function only works on interface level (CD changer level)
- Controls of connected source only possible when device supports AVRCP technology
- USB port on device is only for charge function
- ID3 tag (text) support is not possible

COMPATIBILITY

CAR

This kit is compatible with the following models:

Citroën

C2 2005 - 201> (pase 2 & 3)
C3 2005 - 201> (pase 2)
DS3 2010 - 201>
C4 2004 - 201>
C4 Picasso 2006 - 201>
DS4 2011 - 201>
C5 2005 - 201> (pase 2)
DS5 2011 - 201>
C6 2005 - 201>
Berlingo 2008 - 201> (2e generatie)
Jumper 2005 - 201> (2e generatie)
Jumpy 2005 -201> (2e generatie)
Nemo 2009 - 201>
Xsara 2005 - 201>

Peugeot

206 2005 - 2009
206 2009 - 2011
206CC 2005 - 2007
207 2006 - 2009

In combination with following radio- navigation systems:

RD4 Blaupunkt
RD4 VDO dayton
RT3 CAN gestuurd Magnetti Marelli
RT4 Navidrive Magnetti Marelli
May Way RNEG Magnetti Marelli
Wip Nav
Wip Sound

Tested on the following radio- navigation systems:

RT3-N3-04 (Magnetti Marelli)
RT3-N3-02 (MAGnetti Marelli)
RD4 radio systems
Radio PSA (RD4) N1
RT3-N3-10 (14-04-06)
RD4-N2-00 (Blaupunkt)
My Way RNEG systems
RT3-N3-10 (Magnetti Marelli)
(*met 12-pins wisselaar aansluiting)

Remarks:

- CD changer option must be programmed at the dealer with DIAG2000
- Display of radio must be activated correctly
- Only for radio- and/or navigation systems with 12-pins changer connection
- Other models of radio- navigation systems we do not have (yet) test results
- When model type is mentioned, please also check your system at 'Compatibility' tab
- When you doubt about compatibility please contact NavInc
- Original CD changer will be disconnected
- Only for CAN-BUS controlled systems
- No text support
- Skipping folders is limited to amount of optical CDs the original radio can handle
- With RT3 systems you must check the software. MENU button of RTI device must be pushed and read software status: **6.x is CAN-BUS system, 5.x is VAN-BUS system**
