

DESCRIPTION

General

With the NavInc Bluetooth interface it is possible to stream audio through every smartphone or tablet and to connect these devices with the original radio- and/or navigation system of **Nissan & Infinity**. The interface makes use of the original CD changer connection port.

Beside the interface is equipped with a Bluetooth carkit function.

Features:

- Connect your Bluetooth device wireless with the original radio/navigation system in CD quality
- Charge function through USB port
- Compatible with Apple, Android, Windows & Blackberry smartphones
- Automatic Stop-Play function when switching from iPod to FM/CD/Tape
- Controls of connected device via original steering wheel controls (when available)
- Controls of connected device via original radio/navigation buttons
- Controls of connected device itself
- Extra audio input via jack 3.5mm (MP3 or notebook)
- Supports music streaming via A2DP Bluetooth protocol
- Supports controls via AVRCP protocol
- Plug & Play cable kit
- Bluetooth carkit function (with controls)
- Automatic Stop/Play function with incoming calls

BLUETOOTH STREAMING FEATURES

Wireless connection via Bluetooth for audio streaming via A2DP complete with charge function possibility (via USB port).

When the source supports AVRCP technology it is even possible to control the connected source via the original radio- and/or navigation system. It is also possible to control via the device itself.

Control options:

- Next track
- Previous track

- Volume +
- Volume -
- Fast forward

Controls also works with Apps like Spotify and Google Play.

AUX INPUT FEATURES

External AUX input via 3.5mm jack connection for connecting external audio sources such as:

- Notebook
- MP3 player
- DVD player
- Etc.

BLUETOOTH CARKIT FEATURES

The NavInc Bluetooth interface is equipped with a carkit function with control functions and automatic Stop/Play function with incoming calls.

Features:

- Carkit function with automatic Stop/Play function
- Automatic synchronization of phone with Bluetooth interface
- **Optional** microphone with echo- and noise reduction
- Automatic mute function (only in CD changer mode)
- Accept, deny and hang up conversations via radio buttons
- Audio of conversations via original sound system

USB CHARGING FEATURES

The NavInc Bluetooth interface has a USB port for charging connected devices.

NOTES

- Check tab 'Compatibility' to see if the interface is suitable for your radio- and/or navigation system
- Audio streaming and carkit function only works on interface level (CD changer level)
- Controls of connected source only possible when device supports AVRCP technology
- USB port on device is only for charge function
- ID3 tag (text) support is not possible

Almera Tino 2000 - 2003
Almera Tino 2003 - 2006
Micra 1998 - 2000
Micra 2000 - 2003
Micra 2003 -2005
Micra 2005 - 2008
Micra 2008 - 2011
Murano 2005 - 2008
Murano 2008 - 2011
Navara 2004 - 2011
Note 2006 - 2009
Note 2009 - 2011
Pathfinder 2005 - 2009

Pathfinder 2009 - 2011
Patrol 2008 - 2010
Primera 1999 - 2002
Primera 2002 - 2004
Primera 2004 - 2008
Tino 2003 - 2011
Tiida na 1997
X-Trail 2001 - 2011
QashQai 2004 - 2011

Tested on the following radio- navigation systems:

- OEM radio's with "MIX" button
- OEM radio's with Bose system
- OEM radio's with Clarion system
- OEM radio's with Panasonic system

Tested on the following radio- navigation systems types:

BP9345, CK106, CA1A 48, CT008, CT020, CT098, CT138, CY13C HY00E, CY 460,
PN2530H, RM-V53GAEA
PN-1628V, CY036, CNA-48, PN-1628M

Remarks:

- Only for radio- and/or navigation systems with 12-pins changer connection
- Other models of radio- navigation systems we do not have (yet) test results
- When model type is mentioned, please also check your system at 'Compatibility' tab
- When you doubt about compatibility please contact NavInc
- Original CD changer will be disconnected
- No text support
- Skipping folders is limited to amount of optical CDs the original radio can handle
