

General

With the Maestro interface it is possible to connect different audio sources with the original radio/navigation system.

The selectable sources are: Bluetooth A2DP streaming, Apple iPod/iPhone input, USB input & AUX input via 3,5mm jack connection. The sources can be operated via the included remote controller or through the original steering wheel controls *. Additionally, the interface also includes RDS text display on the display of the original radio and/or navigation system.

Audio of the iPod/iPhone/USB/AUX will be played in high quality through the original sound system of the vehicle. The quality of this product is similar to the original CD changer or even better.

The Maestro 3.0 interface has also handfree kit functionality embedded.

*See tab "Compatibility"

Features:

- # USB input for playing MP3/AAC/WMA files via USB device or HDD
- # iPod/iPhone/iPad connection including charge function
